

Project Manager

Permanent | 37.5 hours per week
£35,000 - £50,000 per annum

Electricity Sector

76 King Street
Manchester
M2 4NH

About Threepwood Consulting

We are a growing and industry respected power engineering consultancy with a mission to improve the performance of electricity networks for our clients in the UK and overseas.

Our team of Consultants are widely known for their considerable knowledge, capability and experience of managing electricity transmission and distribution networks and assets. This has been gained from first-hand experience of working within or consulting for electricity network operators.

Our clients are: owners and operators of electricity networks (licensed public networks and private networks), energy trade associations, generators, renewable energy companies and manufacturers.

The Opportunity

Have you the capability to manage consultancy projects that deliver innovative and value-added solutions for electricity networks? Do you have the potential to successfully manage projects being delivered by industry respected consultants and leading technical experts in their field? If so, then we are looking for you to join our team and make a real difference.

We will require you to project manage consultancy projects and ensure they are successfully delivered on time, to budget and to the required quality. These include a wide range of technical consultancy projects such as authoring industry level electrical policies and standards, connecting low carbon technologies to electricity networks, assuring electrical safety of large generating stations and wind farms.

In particular, your primary role will be to manage a large and important technical consultancy framework contract with one of our UK clients at a national level. You will be the principal point of contact with the client's senior management and technical teams and you will lead and co-ordinate the work of our own consultant teams. You will also be responsible for ensuring any outputs, including technical documentation, is delivered to the highest quality given Threepwood's reputation for excellence in this area. You will report to the Managing Director.

Your role will be to interface with our clients and understand their problems and needs in relation to the consultancy services we provide.

With support from the Threepwood Consulting team you will propose and oversee the delivery of bespoke consultancy solutions, which draw upon our strengths and capabilities.

A key aspect of the role is to: prepare project plans/programmes/budgets, produce progress reports (internal and customer facing), facilitate regular progress and strategic meetings with our clients, ensure deliverables are prepared and submitted to clients on time and to the required quality standards. We are also looking for someone who can work with our technical consultants to develop and deliver costed project proposals.

We are looking for you to already have experience in managing technical projects preferably (although not essential) in the electricity or renewables sectors.

We will look to develop and support you in becoming a competent and nationally recognised project/contract manager within the consultancy sector.

In addition to using your project management expertise, you will be expected to support our business development activities.

The role will be home based with the opportunity to work from our offices in Altrincham or Manchester. You will be required to travel to meetings within the UK when required.

About You

You will:

- be managing technical projects/contracts (preferably but not necessarily in the electricity sector)
- be highly self-motivated and organised
- be someone who excels in a team environment, who demonstrates reliability, positivity, flexibility and makes an active contribution when working with others
- have the core values of honesty, integrity and professionalism
- have excellent written and verbal communication skills
- be able to co-ordinate/manage technical teams
- be commercially astute
- have the capability to develop into a senior projects/contracts manager
- preferably be in an engineering consultancy or an electricity network operator (not essential)

Qualifications & Professional Experience

You will:

- have a recognised project management qualification or equivalent experience
- be in the process of achieving (or have already achieved) professional membership/registration of a project management institution (e.g. Association for Project Management)
- have at least 2 years of post graduate professional experience
- an Honours degree or equivalent qualification

What Can We Offer

The successful candidate will enjoy:

- a competitive salary (negotiable based on skills and professional experience)
- an annual company performance related bonus
- a generous company pension contribution
- 27 days annual leave per year plus bank holidays
- flexible home working
- family friendly working arrangements
- use of a high specification laptop and smartphone
- group private medical insurance cover
- health cash plan

Next Steps
